What is DAF?

DAF is a DEFI token made for easy investors with the help from crypto experts.

What is DEFI?

DeFi tokens can be defined as financial applications that run on Blockchain technology and are decentralized. These tokens use the concepts of the traditional banking system and thus they are highly liquid as well. The hype around DeFi tokens and the DeFi industry is because of its power to remove the third party or the middlemen in the financial industry. Most of the DeFi tokens are built on Ethereum Blockchain.

VISION

Diamonds are Forever features a unique rewards system promoting sustainability.

A portion of the rewards pool will be re-routed to a second pool, to then be added back into the reward pool ensuring maximum **DAF** Token reflections for long term holders, along with eliminating the problem of people selling and taking their portion of the rewards pool with them.

This unique set of tokenomics means every person who sells all of their tokens leaves a percentage of their rewards to be redistributed between all holders.

MISSION

Launching in November 2021, **Diamonds are Forever** is on a mission to be the first rewards coin of its type, with a sustainable reward system promoting holders and punishing swing traders.

Diamonds are Forever is a fully decentralized currency on a mission to spread NFT awareness to the average crypto investor.

Diamonds are Forever pays out its holders in % of all NFT sales., every transaction incorporates a 10% fee of which **Diamonds are Forever** Token is then automatically purchased and placed in a pool to be re-distributed amongst holders. Simply put, if you were to own 1% of the **Diamonds are Forever** supply, you would subsequently hold 1% of the rewards pool.

WHY DAF?

2% Automatic Liquidity: 2% of every transaction will be sent to PancakeSwap for Liquidity. Pancakeswap is a BSC-based decentralized exchange that fixes the low liquidity problems of DEXs through the liquidity Pool concept. A liquidity pool always contains a pair of tokens, which you can trade. The project's Smart contract deposits 2% from every buy/sell transaction as \$DAF and \$BNB into a liquidity pool. For every buyer of 100 or more in a single trade, the buyer will be rewarded with 8% \$bDAF token.

SCALABILITY ISSUES TRUST AND SECURITY

OUR ROADMAP

PHASE 1

- Apply for listings on cg and cmc.
- Marketing push focused on influencers and community shilling.
- Dex trending.
- Website launch

PHASE 2

- Contract Audit
- NFT platform
- Youtube influencers

PHASE 3

- BTOK Advertisements
- Exchange listings
